

TeamConnect™

Collaborative Business Management & Scheduling

TeamConnect™ allows you to plan, schedule and manage all aspects of your business more effectively. And it's easy enough for everyone to use, from storeroom to boardroom.

TeamConnect™ only requires users to have an Internet browser with access to your application server. Work from anywhere via LAN, WAN or Internet using ethernet, WiFi or GPRS. This allows you to include partners, suppliers, contractors and clients in your business processes.

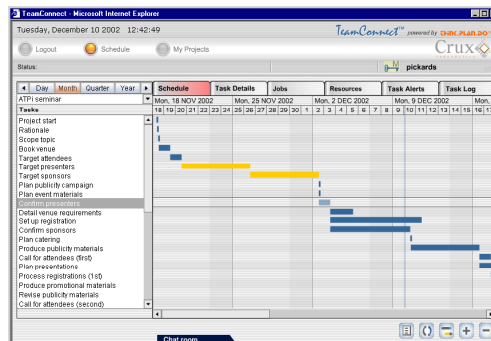

TeamConnect™ provides immediate ROI through fewer meetings, fewer reports, improved planning and efficient resource, knowledge and process management. Get clear and instant feedback on all business activities — anytime, anywhere.

See a schedule across all your projects at a glance. Zoom in or out to more clearly see the week or year ahead.

One click and see all the projects your group is working on.

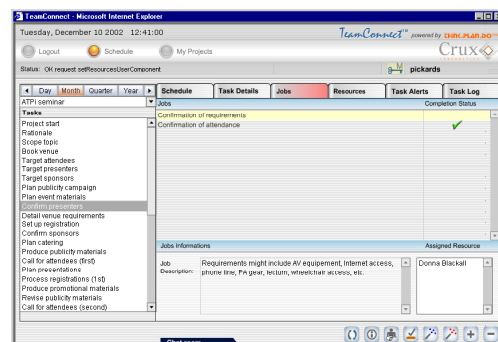

Drill down into a project to see the Gantt view of tasks.

Dependencies are highlighted to avoid clutter.

Drill down into a task to see the one or more jobs it contains.

The ability to group jobs into tasks allows you to capture all that has to be done without a complicated schedule.

Contact us for an obligation-free demonstration. These can be conducted via an online tele-conference anywhere in the world.

TeamConnect™

Key Features

Distributed Access

If you can get online you can get access to your business plans

User-friendly Interface

A unique user interface has been designed for clear and intuitive use

Project Templates

Create new schedules from existing templates, and create new templates from successful projects

Knowledge Base

A dynamic repository of company plans, processes and products

Archive or Assign

Archive old projects or assign them to others to complete

Collaborate

Allow groups or individuals to view or contribute to your plans

Alert

Alert collaborators and resources to changes via SMS, email, and fax

Shared Resource Pool

Locate and define project teams from a repository of company resources

Customisable Reporting

Easily create your own project reports

Superior Integration

Integrate with time tracking, accounting and procurement systems; MS Outlook and TeamDo

Easy Administration

Define users, teams and access control from a simple console

Delivery Focussed

Focuses on project deliverables and risk management

Devolve Responsibility

Let others create, manage, and share projects to avoid bottlenecks

Monitor

Track progress through simple check boxes, notes, and effort re-estimates

Technology

powered by **think.plan.do™**

TeamConnect™ is built using think.plan.do™, Crux Cybernetics' enterprise application development framework. think.plan.do™ provides the ability to quickly tailor and enhance TeamConnect™ to meet user's specific needs.

TeamConnect™ runs on an application server such as BES, JRun, WebSphere, or JBoss. This ensures reliability and scalability to meet the needs of small and large enterprises.

TeamConnect™ stores data in a relational database such as Oracle, MS SQL Server or PostgreSQL. This ensures integrity and performance

TeamConnect™ is accessed via Macromedia Flash plugin. This is installed in nearly half a billion Internet browsers — lowering TCO and easing integration.

Effectively manage your resources – anytime, anywhere
